

FW-DVMR

Digital Video Multiplex Recorder

The FW-DVMR is a full-featured standalone digital video recorder that offers unparalleled video quality and maximum reliability. This Digital Video Recorder is extremely easy to operate, effortlessly integrates with existing video surveillance systems, and can be utilized in a variety of environments. With the ability of adding up to four internal hard disk drives the storage capacity is endless!

The FW-DVMR enables the user to record motion-activated digital video and display multiple cameras simultaneously from the camera site or a remote location. Whether your objective is loss prevention, management, access control, remote monitoring, or home security, the FW-DVMR is sure to surpass the goals of your application.

- MPEG-4 compression with an embedded Linux operating system
- Simultaneous live monitoring, recording, playback, networking and archiving
- Minimum of 2TB storage
- Control access via administrative and user level passwords
- USB2.0 or external hard drive backup capability
- PTZ control with presets

FW-DVMR
(16-channel)
